The MTP a community run project

Facts that you must be already aware of as it is your project and run by you the grassroots. The following facts should assist you when the MTP update is given to you on 27<sup>th</sup> February 2010.

Did you know:-

In conference 2006 the MTP was agreed conditionally on having 15 couples per year?

In 2006 the budget forecast on each 'scholarship' or Imams money was \$50,000 per couple for the full duration of the course?

In 2006 conference the MTP was agreed based on the community needs and community tailored course?

Did you know:-

In 2007 there were only 2 couples enrolled on the course which went ahead?

In 2008 there were on 3 couples enrolled on the course?

In 2009 there were 0 couples enrolled on the course?

Did you know that from the 6 students that enrolled in 2008 the MTP is left with 1 student due to

2/26/2010

dropouts?

Did you know that part of the dropout after a year was due to lack of trust in the MTC (Jaffer Dharamsi) who has no experience in religious education and lied as his con technique to enroll students?

Did you know:-

That the MTP has only 5 students in 3 years of marketing around 98 communities which air fares, hotels and catering are paid by Imam (as).

That there are 4 students in one class and 1 student in another?

That Imam (as) through community agreement is paying for 9 teachers coming in to the MTP and teaching a class that consists of 1 student?

Did you know:-

That a tailored Howza course was going to be prepared by the Zainabiya Howza in Damascus or the Al Sadiq institute in Qum who have years of religious educational development strategies, but the MTC decided to an in-house development course?

Did you know:-

That the MTC trusted Syrian locals who cut copied and pasted religious material as they lacked the competences and prepared a whole four year syllabus?

Did you know that as the MTC himself is incompetent he felt that the locals were doing a great job in serving the community and continued to dish out a total amount of over \$44,500 to pay for work copied and cut off the internet compliments of Imam (as)?

Did you know that after a payment from Imam (as) of over \$44,500 approved by 'the community' to the local internet literate Mullas of Syria, the plans were checked by a semi competent Khoja from Qum and were deemed unfit for a purpose and are now currently stored away catching dust on them and are far from the current syllabus being taught?

Did you know that even though the MTP was agreed at \$50,000 per couple throughout the four year course that in 3 years the MTP has spent over \$628,000 with only 5 students?

Did you know that extra hidden cost of airfares, particular wages, cost of land and the MA 'high cost are excluded from the current expenses and unknown?

Did you know that the MTC calls this justified value of community money?

Did you know:-

That the Howza syllabus has been changed every year and does not provide a mere glimpse of Quran and that some senior students are worse then our Madressa students?

Did you know that the Arabic lecturer has failed in his guarantee and those senior students after three years of intense study speak and understand less then what students learn in the university after a year?

2/26/2010

Did you know that the tailor made Arabic course which was solely for our community is a cut and copy of a developed course for Arabs only and not non natives which we have paid for?

Did you know:-

That the MA modules that were originally agreed within meetings have now been changed to atheists teaching Islam to our future Mabalighs?

Did you know that the Mubaligh will spiritually guide our community and their spirituality is compliments of atheists?

Did you know that our students in the MTP Howza and future Mabalighs now have faith as part of the Itha Ashari and do not believe in miracles as the teachings of Allah (swt) and class the occultation of Imam Mehdi (AF) as a MYTHOS?

Did you know:-

It is Islamic Haram under the Khums guidelines to pay Imam (as)'s money to non Muslims teaching Islamic faith as such but the community continues to pay them and also a full board trip to the cradle of civilization?

Reflection on the MTP and what questions one must ponder on:

Is this really a community run project and has the original aims been lost to a minimalist approach as approved in conference 2006?

Is the MTP really that different to what we teach in the Madressa?

Is the MTC (Jaffer Dharamsi) a competent individual with the correct religious background to conduct such a role?

Is it fare to utilize Imams money and run a class with 1 student?

Is it justified to state that we pay \$50,000 for couples in four years and spend \$628,000 in three years with only 5 students?

Is it fare to run a project that was agreed on a basis of 15 couples per year which would make it 45 couples till date and we continue till date with only 2 and a half couples?

is it fare that the Ijaza holder of the community elected by the grassroots go against what conference has agreed and leads a one man show against the will of the very ones who has provided him a trusted position?

Is it fare that other regions of the World federation have no say in community business but are persuaded as if they have a say and then are deceived through Islamic crime?

Is the community grassroots in favor of what has been conducted thus far and can they also call this justified Imams money spent?

Is it not an obligation to stop an Islamic crime of Imams money being spent on atheists teaching our Muslims spirituality which is something not touched by our own at the MTP?

Could we trust the graduates of the MTP coming into our communities and teaching our children with non Islamic beliefs taught to them by atheists?

Should there be a body that we could elect who are competent in religious education like Maulana Zafar Abbas who has fully resigned from the MTP for reasons that are unknown?

Should the MTC have told Maulana Zafar Abbas before resigning on what Islam is? Is he competent?

Should stakeholders such as Dr Hassnain Walji have a say behind the scenes on what the project should teach and who should be involved?

should have the MTC conned the WF in spending as an additional figure from the above quoted, \$350,000 on a piece of land in Syria that cant be built on as it is agricultural land?

2/26/2010

Should the land remain in the name of Ahmad Hassam and should something happen to him the land will go into the name of his son who must sell it within the year for whatever price otherwise the government shall take possession of it according to Syrian Law?

It is important to ponder and rightfully walk in according to the traditions given to us by the prophet (pbuh) and not those incompetent sinners who feel they know best when history shows their Islamic crimes.

If we are unable to protect the money of Imam today, how could we be a part in his army when enemies will wage war against him.

This is one test from him amongst many others to see if you as an individual qualify to be protected by him when that day comes.

Please act in according to what your conscience tells you.
